DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are:

Regarding claim 5, this claim is directed to an apparatus for determining a zeta potential generated between a channel wall and a fluid. It is unclear as to how the device facilitates the determination of the zeta potential. Does the claimed device incorporate a means for measuring an amplitude of oscillation of the interface between the electrolyte solution and the mixed solution, and then determining the zeta potential from a standard relationship between the zeta potential and the amplitude? The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Furthermore, a feature that is taught as critical in the specification should be recited in the claims (see MPEP § 2164.08c).

Allowable Subject Matter

Claims 1 – 4 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the cited prior art neither teach nor fairly suggest the methodology for determining a zeta potential generated between a channel wall and a fluid employing a T channel device as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
